

## "Newport/Kendleton" Flat Panel Interior Doors

## "Newport/Kendleton" General Information

### "NEWPORT"

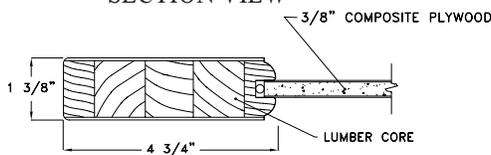

### "KENDELTON"

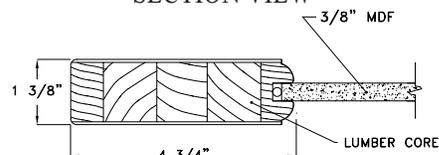

**NEWPORT:** The "Newport" collection includes a series of door styles that are constructed with flat (recessed) plywood panels and lumber core stiles/rails. Newport doors are available in both 1 3/8" and 1 3/4" thicknesses.

**KENDLETON:** The "Kendleton" collection includes a series of door styles that are constructed for painted applications with lumber core stiles and MDF center panels and intermediate stiles/rails. **Kendleton doors include a "Base" primer at no additional charge** (see page 53 for a description of "Base" primer and "Premium" finish options). Kendleton doors are available in both 1 3/8" and 1 3/4" thicknesses. Kendleton doors are a perfect complement to Newport doors and vary only in construction.

## "Newport/Kendleton" General Information

### NEWPORT/KENDLETON

#### CENTER PANELS:

**Flat (Recessed) Panels:** Flat panels are 3/8" or 1/2" thick composite-core plywood or MDF. Flat panel doors do not exhibit the staving found in a raised panel door. Veneer is sliced from the log differently than solid lumber minimizing the staving in veneer used to construct flat panel doors.

#### ARCH OPTIONS

Newport & Kendleton door styles are available with a variety of Arch options.

##### ROMAN ARCH (20 SERIES)

Doors specified with a Roman Arch are designated as a "20 Series" arch on the order form. The door has a square (flat) top and the top panels are carved with a Roman Arch. (i.e. N4-12, 20 Series) A "Continuous Arch" option is available for 20 Series arch double doors, by-pass and double pocket doors at no charge. Specify "Continuous Arch 20 Series" when placing your door order.

See page 31.

##### CATHEDRAL ARCH (30 SERIES)

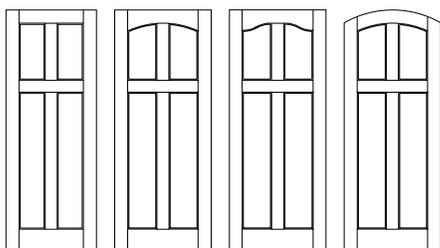

Doors specified with a Cathedral Arch are designated as a "30 Series" arch on the order form. The door has a square (flat) top and the top panels are carved with a Cathedral Arch. (i.e. N4-12, 30 Series)

##### ARCH TOP - EYEBROW (40 SERIES)

Doors specified with an Eyebrow Arch Top are designated as a "40 Series" arch on the order form. The door has an "eyebrow" radius at the top of the door and the top panels are carved with a Roman Arch. **Arch Top doors can be pre-hung in Solid Wood Jamb's only.** Casing is available on a special-order/custom quote basis. (i.e. N4-12, 40 Series)

Other Arch/Radius options are available on a custom quote basis.

Contact Customer Service with specific information to receive a price quote.

#### PROFILE OPTIONS

Newport and Kendleton doors are available with a choice of "Profile Options". A Profile Option designates the decorative profile of the "sticking" (inside edge of the stile/rail). A Profile Option must be specified for Newport and Kendleton door styles.

###### PROFILE

##### "BASE" PRIMER (Kendleton):

Panels are individually hand-sanded before the door is assembled. Once the door is assembled, the entire door is carefully machine-sanded and then hand-sanded. The entire door then receives one coat of catalyzed conversion varnish primer. Stiles and rails are then coat-sanded prior to packaging and delivery. Please note that additional sanding is required before jobsite finishing. (*Kendleton doors automatically include a "Base" primed finish at no charge.* *Pre-hung doors include a "Base" primed jamb.*)

##### "PREMIUM" PRIMER (Kendleton):

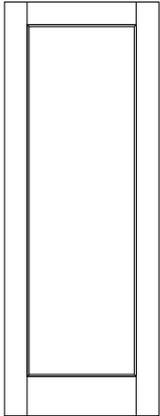

Panels are individually hand-sanded and then primed before the door is assembled. Once the door is assembled, the entire door is carefully machine-sanded and then hand-sanded. Joints are filled and sanded flush. The first coat of catalyzed conversion varnish is applied and then the entire door is hand-sanded again. A second coat of primer is applied and then the door is completely hand-sanded before packaging and delivery. Please note that the door must be lightly scuff-sanded prior to jobsite finishing to ensure good adhesion of the final finish coat(s).

*Enamel finishes are also available from the factory.*
