"French" doors are available with "Worthington" applied molding on a custom quote basis.

WORTHINGTON: The "Worthington" collection includes a series of door styles that are constructed with solid wood raised panels, a decorative applied molding and lumber core stiles/rails. Worthington doors are available in both 1 3/8" and 1 3/4" thicknesses. 1 3/4" thick doors can be ordered as 'A' Series (3/4" thick panels) or as 'B' Series (1 1/8" thick panels). Passage and Double doors have decorative molding applied to both sides of the door. Bi-Fold units have molding applied to the front (face) side only. **Pocket and By-Pass doors are not available** because the applied molding can cause interference with the operation of the door.

ARCH OPTIONS

Worthington doors are available with an arch on a quote basis only.

PROFILE OPTIONS

A Profile Option designates the decorative profile of the "sticking" (inside edge of the stile/rail) *and* the raised panel. A profile option must be specified for Worthington door styles.
