## WHO IS OPTICAL ILLUSIONS LTD.?

With 10 years in the fiber optics industry, on October 1, 1997, Optical Illusions, Ltd. was founded. Through experience, innovation, and enthusiasm, we embarked to provide a service of artistic illumination that would be unparalleled in the industry. We not only brighten a dark environment, we have strived to create a pleasing atmosphere on every project. We believe the strategic placement of these fiber optic lights will transform a formerly dark canvas into a colorful masterpiece of light.

## WHY USE FIBER OPTIC CABLE?

Fiber optics utilize one energy efficient fiber optic illuminator to produce multiple points of light. These points of light carry no heat or electricity thus making them versatile and safe. Fiber optics eliminate the need for routine bulb maintenance associated with traditional forms of lighting. By placing a color/filter in the illuminator, these points of light will actually change color. Whether you are relaxing or entertaining, you have achieved a safe, efficient lighting solution that is second to none.

## UNIQUE DESIGNS, OUTSTANDING SERVICE

With an understanding of lighting that is both technical and aesthetic, we create art with light. Our clients provide us with their objects of beauty, and it is our mission to custom design a fiber optic lighting system that fits their needs. Using high-quality products, Optical Illusions, Ltd. will provide a visual pleasure that is safe, energy efficient, and virtually maintenance-free, for years to come.
