

COLUMNS & PORCH POSTS

Styles come and go, but columns have stayed in fashion for over 3000 years. The only changes in columns over the past number of years have been the types of material they have been made from. Today, the best columns are made from Chemcrest's high-density polyurethane material.

Our porch post styles are structural and our columns easily conceal existing unsightly support posts or pipes already in place. In every case, Chemcrest's polyurethane columns and porch posts are more durable than wood and do not require the

continuous maintenance or rot repair that wood products demand.

Chemcrest's polyurethane columns come in four distinct styles: smooth or fluted, in straight, tapered or boxed. Use one of Chemcrest's columns to transform your living/dining room or further detail your patio or porch. Add a scamozzi crown or capital to further enhance the look.

Our plant stands have the same column look to them. Add a decorative cap and base to beautify a corner or hold a treasured memento such as a picture or vase. Easy to paint, lightweight and fun to decorate, wherever you choose to place them, they are sure to make a visual statement in your room.

Chemcrest Plant Stands or Table Top Columns come in a variety of widths and heights and in fluted or smooth.

Columns.

Chemcrest columns are NOT structural, however they are ideal for concealing structural steel or wooden posts. Column pricing includes a standard base only – a Capital must be ordered separately to complete the Column. Columns are shipped ASSEMBLED unless otherwise specified. (Un-assembled Columns are shipped in two vertical half columns with a tongue and groove edge and an attachment spline – please specify “NOT ASSEMBLED” on your orders.)
