

SYNTHETIC PORCH POSTS

5" Post

6" Post

Each Post Includes:
(1) Post
(2) Mounting Plates
(8) Screws

MOUNTING PLATE

Dixie-Pacific is pleased to introduce two innovative synthetic porch posts: QuickPost-LTF (Lifetime Finish) and DuraPoly Post-(Paintable Finish). The crisp colonial detail and affordable pricing of our posts is unparalleled in the industry.

The QuickPost-LTF is available in a vibrant white or desert tan vinyl finish that is UV protected and never needs to be painted. It perfectly complements our QuickRail™ – synthetic railing system. The DuraPoly

Post is a synthetic post that will never rot or decay and can be painted to match your project.

Our posts are available in sizes 5" x 5" x 8'-8" (actual 4 1/4" width) and 6" x 6" x 8'-8" (actual 5 1/4" width), have a structural metal insert (load capacity 5" = 2,500 lbs.; 6" = 5,000) and have a limited lifetime warranty.

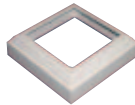

Each post includes (2) mounting plates and (8) screws. Trim Kits are available and sold separately.
